Melody Kemp worked as an occupational health and safety practitioner for many years and has written extensively on the politics of labour and in particular the work of women. She has lived in Asia for many years and is now a free lance labour educator and writer.

Acknowledgments

This book was made possible by the hard work, sisterhood and dedication of Isis International-Manila. Special thanks to Terry Farr, an old friend, who passed the hat in Australia to raise money which enabled me to work on the first draft in Manila.

I am pleased to acknowledge these agencies and people for having faith in the necessity of this production, and in my ability to make it happen.

Another thanks to my partner, Sean Foley, who supported me financially, intellectually and spiritually during the long dark nights of this book.

This book is also dedicated to Tata Jacinto, who worked so hard to bring the book to life. Unfortunately, her own was cut short by cancer. She did not live to see it published. May your spirit fly Tata.

Finally, my heartfelt thanks to the hundreds of women workers who inspired me with their courage and spirit. They may be invisible to the world, but they live on in my heart.

My love to you.

— Melody Kemp

Isis International-Manila acknowledges the invaluable contributions of Lilian Mercado Carreon, Lynn Lee and Marianita Villariba.

We would also like to dedicate this book to Tata Jacinto who patiently and passionately worked with us not only in this book but in a number of other feminist publications. Her work in this book is particularly meaningful since it was during this time that she was diagnosed of breast cancer and fought a fierce battle against the disease. She passed away without seeing the book published —wherever you are Tata, it's finally here — we offer this labour of love to you.

We express our deepest gratitude for the continued support of Evangelisches Missionwerk (Germany); Global Fund for Women (USA); The Royal Danish Ministry of Foreign Affairs (DANIDA); the Ministry of Foreign Affairs, the Netherlands; and the Swedish International Development Authority.

Table of Contents

| | |
|--|-----------|
| How This Book Came to Be | 3 |
| How to Use This Sourcebook | 13 |
| | |
| Chapter 1 Women's Business | |
| Women and Occupational Health | 17 |
| The Right to Know - Occupational Health and Safety Regulations | 18 |
| First Came the Law | 20 |
